

2018 ICTS Pilot Award Recipients

The ICTS is pleased to announce the awardees of the 2018 Pilot Grant Awards.

The ICTS Pilot Grant Program is inspired by the Common Fund's NIH Director's Transformative Research Award initiative (formerly known as the Transformative Research Project (TR01)). The ICTS Translational Science Pilot Grants are designed specifically to support exceptionally innovative and/or unconventional research projects that have the potential to create or overturn fundamental paradigms.

Yama Akbari

A novel, prognostic EEG signal during cardiac arrest with therapeutic potential

Christopher Hughes, PhD

Validation of a Microfluidic Device to Study Patient-Derived Colon Cancer Cells and Determine Clinical Predictive Value

Michelle Khine, PhD

Conformal Wearable Electronics to Monitor Congestive Heart Failure

Virginia Kimonis, MD

Phase I/II Study of CB5083 In Patients With VCP Inclusion Body Myopathy

Kate Kuhlman, PhD

Neuroendocrine and inflammatory mechanisms of cognitive and affective processes in adolescents exposed to childhood adversity

Wendy Liu, PhD

Immunomodulatory biomaterials for skin regeneration

Hamid Moradi, MD

Safety and efficacy of 2- arachidonoyl-sn-glycerol in treatment of end stage renal disease (ESRD)-related cachexia
